SKILLS

- **Languages:** Java, SQL, HTML, CSS, Javascript, Typescript
- **Tools:** Windows, Eclipse, VS Code, Git, Github, Database
- **Technologies:** React, Angular, Node.js, Sass, Bootstrap

WORK EXPERIENCE

Freelance Web Developer   **February. 2023– Present**
Freelance web developer   *Remote*

- Worked with clients, primarily small businesses, on creating and setting up their websites utilizing HTML, CSS, JS, React, and wordpress. Also, provided API integration and connected Email with MailJS to improve user interactivity.
- Provided ongoing website maintenance and support, including updating new features/content for products, bug fixes, and etc.

Revature   **May. 2022– December. 2022**
Full Stack Developer (Contract)   *NYC, NY*

- Contributed to a high-performing development team, working in a fast-paced Agile environment and participating in daily SCRUM stand ups. This experience honed my ability to work effectively in a team setting and communicate with both technical and non-technical stakeholders.
- Developed a real estate API capstone project, utilizing my skills in web development to create a user-friendly application that retrieves real-time housing information, such as prices and photos. This project demonstrated my ability to integrate APIs into web applications, making me a strong candidate for full stack development roles that require experience in web development.
- Language/Tech stack utilized: Java, SQL, HTML, CSS, JS, TS, Angular

EDUCATION

New Jersey Institute of Technology   **June, 2017**
BA, Biology   *Newark, NJ*

PROJECTS

Arknights Wiki
HTML, CSS, Typescript, Angular (https://github.com/JJang95/Arknights_wiki)

- Utilized Rhodes API to create a user-friendly platform for searching different characters in the popular mobile game, Arknights
- Implemented HTTP requests/fetch and asynchronous programming to provide real-time updates and information about each character, including images and background details
- Developed a single-page website with a responsive design, utilizing flexbox layout to ensure optimal viewing on multiple devices.

Personal Portfolio Website
HTML, CSS, JS, React (https://github.com/JJang95/portfolio_main)

- Created a full functioning portfolio website that demonstrates my experience and skills as a full stack developer. The website is divided into 6 major components (Home, About Me, Experience, Portfolio, Contact, and Footer) making the project flexible and organized.
- Hosted by netlify and linked with MailJS so users can easily contact using the contact me component of the site.
